

National Center for Environmental Health (NCEH). The purpose of this proposed study is to collect additional data to validate health outcomes reported by participants in the Health Assessment of Persian Gulf War Veterans From Iowa. The original data collection consisted of a telephone survey of 3,695 military personnel who

served during the time of the Persian Gulf War and listed Iowa as their home of residence. Data will be collected from subjects who participated in the telephone survey to validate the self-report of asthma. Lung function assessment, tests of airways hyperactivity, and standard respiratory health questionnaires will be

administered. Review of medical records, standard physical examination, and laboratory evaluation will be conducted to validate multi systemic conditions, including chronic fatigue syndrome and fibromyalgia. The total annual burden hours are 1,394.

Respondents	Number of respondents	Number of responses/respondent	Average burden/response (in hrs)

Advisory Committee for Energy-Related Epidemiologic Research: Conference Call Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Centers for Disease Control and Prevention (CDC) announces the following conference call meeting.

Name: Advisory Committee for Energy-Related Epidemiologic Research (ACERER).

Time and Date: 4 p.m.-5 p.m. EDT, June 28, 1999.

Place: The conference call will originate from the National Center for Environmental Health (NCEH), CDC, in Atlanta, Georgia. Please see "Supplementary Information" for details on accessing the conference call.

Status: Open to the public, limited only by the availability of telephone ports.

Purpose: This committee is charged with providing advice and recommendations to the Secretary, Health and Human Services (HHS); the Assistant Secretary for Health, HHS; the Director, CDC; and the Administrator, Agency for Toxic Substances and Disease Registry, on establishment of a

research agenda and the conduct of a research program pertaining to energy-related analytic epidemiologic studies.

Background: ACERER's history began with a 1991 Memorandum of Understanding (MOU), which transferred epidemiologic studies from the Department of Energy (DOE) to HHS. Two related advisory committees were created: the Environmental Safety and Health Advisory Committee at DOE, which was later terminated, and the ACERER at HHS. Upon completion of the transferred studies, funding was available to expand the research program. In 1996, the MOU's scope was broadened to address general public health issues rather than the initial focus on analytic epidemiologic research.

Matters to be Discussed: The conference call agenda is to consolidate ACERER recommended revisions to the current (MOU) between HHS and DOE.

Agenda items are subject to change as priorities dictate.

Supplementary Information: This conference call is scheduled to begin at 4 p.m., EDT. To participate in the conference call, please dial 1-888-422-7105 and enter conference code 690104. You will then be automatically connected to the call.

This notice is being published less than 15 days prior to the meeting due to the difficulty of coordinating the attendance of members because of conflicting schedules.

Contact Person for More Information: Michael J. Sage, Executive Secretary, ACERER, and Deputy Director, Division of Environmental Hazards and Health Effects, NCEH, CDC, 4770 Buford Highway, NE, (F-28), Atlanta, Georgia 30341-3724, telephone 770/488-7040, fax 770/488-7044.

The Director, Management Analysis and Services Office has been delegated the authority to sign Federal Register notices pertaining to announcements of meetings and other committee management activities for both the CDC and ATSDR.

Dated: June 7, 1999.

Carolyn J. Russell,

Director, Management Analysis and Services Office, Centers for Disease Control and Prevention (CDC).

Administration for Children and Families

Submission of OMB Review; Comment Request

Title: National Survey of Child and Adolescent Well-Being (NSCAW).

OMB No.: New.

Description: Title V, Section 429A, in the amendments to Title IV-B of the Social Security Act authorizes the Secretary of Health and Human Services to conduct a national random sample study of child welfare. The NSCAW fulfills the intent of that legislation, and responds to a growing need for better understanding of the child welfare system and the children and families who come into contact with it. The survey will collect data through interviews and assessments with a national sample of 6,700 children along with their parents, caregivers (such as foster parents), teachers, and caseworkers and other agency personnel to assess the characteristics of children and families who come into contact with the child welfare system, the services they need and receive, and the
